

# SHOES MADE IN EU: THE EUROPEAN SHOEMAKER

4. NEWSLETTER

May 2017

We are very happy to share with you our latest project's developments. After various months of hard work, we are ready to launch our e-learning platform on footwear manufacturing.

What will you find there?

An interactive content course composed by 14 training units, which include different lessons with relevant topics needed to know to manufacture shoes. Each training unit includes an assessment that is composed by an on-line quiz, and in some cases a practical exercise, to be reviewed by the trainer.

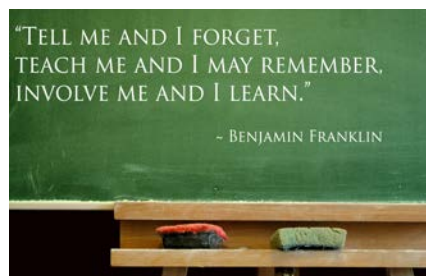

Lessons are delivered with dynamic PowerPoints and case studies, as well as consolidating exercises.

To complete the course, the trainee should go through all the lessons, do the compulsory exercises and the respective assessment.

Didactic materials are displayed on the platform in a clear and transparent manner to learn the knowledge and skills needed to work in a footwear company.

You can access the platform through our project website <http://shoesmadeineu.eu/eu-shoes-platform/>

We continue working to support the quality and modernisation of education on footwear manufacturing, as well as making it available across Europe.

We will soon share with you the guidelines for implementing the work-based learning and the handbook for the integration of the „European shoemaker profile“ composed by: the conceptualisation of the training path; the development of training contents; the creation of the ECVET supporting tools; the creation of the platform and consecutive upload of the main tools and training contents; the issuing of the guidelines related to work-based learning implementation and the pilot test.
